Vinay Kumar

+91 98965-84024 | vipvinaytanwar@gmail.com | GitHub | LinkedIn | Delhi, India | Portfolio

3rd-year CSE student (CGPA 8.87) with hands-on MERN stack experience, AI API integrations, and real-time WebSocket systems. Built and deployed two production-grade platforms. Top 20 in two hackathons (500+ teams). Eager to contribute across the full stack in a fast-moving startup environment.

EXPERIENCE

DRDO – Institute for Systems Studies and Analyses (ISSA) *New Delhi*

Project Trainee *Jun 2026 – Jul 2026*

- Developed MediCompare, a smart healthcare platform for diagnostic price comparison and hospital recommendations, using Next.js, Tailwind CSS, Node.js, and Express.js.
- Designed and integrated REST APIs connecting the frontend and backend, enabling structured healthcare data retrieval and processing.
- Built FastAPI-based services to integrate a pre-trained machine learning model and expose model inference through APIs.
- Implemented a responsive, modular frontend with Next.js and Tailwind CSS alongside backend services in Node.js and Express.js.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, HTML, CSS
Frontend: React.js, Next.js, TailwindCSS
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, PostgreSQL, MySQL
AI/ML: LLM API Integration
Tools: Git, GitHub, Postman, VS Code, Vercel, Netlify

PROJECTS

WaveClean – Smart Coastal Waste Monitoring | GitHub *2025*

- Built a full-stack platform using React, Node.js, Express.js, and MongoDB with scalable REST APIs handling 500+ real-time sensor/volunteer entries.
- Designed analytics dashboards for pollution tracking; implemented automated alerting workflows, cutting manual monitoring effort by ~40%.
- Used Git/GitHub for version control and collaborative feature management across a team environment.

NeuroBeats – AI Music Generation & Remixing Platform | GitHub *2025*

- Integrated LLM and AI audio/voice synthesis APIs into a MERN architecture supporting text-to-music workflows and real-time remixing.
- Built a responsive Next.js frontend with real-time media interaction; optimized async backend processing, reducing API latency by ~30%.
- Managed end-to-end feature delivery from UI to backend integration, with deployment on Vercel and CI/CD via GitHub Actions.

EDUCATION

B.Tech – Computer Science & Engineering, MAIT – GGSIPU, Delhi *2024 – 2028*

CGPA: 8.87 / 10

ACHIEVEMENTS & ACTIVITIES

- Top 20 – Code Synthesis Hackathon 2025, GTB4CEC (500+ teams): Built full-stack automation platform using MERN stack under competition constraints.
- Top 20 – Buildathon Hackathon: Delivered innovative product under tight deadline; recognized for rapid prototyping and real-world problem solving.
- Main Coordinator – CSE Internship Fair 2026, MAIT: Managed recruiter relations, logistics, and 2-day event execution for 200+ students.
- Student Coordinator – Brainstorm Summit 2026 (Research Nexus, MAIT): Oversaw participant engagement and event activities.
